INFORMATION REPORT

REPORT NO. CD NO.

COUNTRY Austria

DATE DISTR. 21 October 1952

SUBJECT Miscellaneous Information on the
Soviet Oil Administration (SNV)

NO. OF PAGES

PAGE 25X1C

ACQUIRED NO. OF ENCLS. -
(LISTED BELOW)DATE OF
INFO. SUPPLEMENT TO
REPORT NO. 25X1X
25X1A

This report, which covers the period from mid-January to mid-May 1952, does not describe the SNV Headquarters order of 27 May calling for a severe cutback in SNV activity or the subsequent apparently normal operation of the Soviet-controlled oil field areas. However, source has described certain developments in the SNV Purchasing Office prior to mid-May which may support the previous interpretation of as an indication of financial difficulties in the Soviet Oil Administration. See paragraphs 21-22 below.

SNV Personnel

1. Grigori Sidorenko, General Director of the SNV, was recalled to Moscow on 9 April 1952 and returned to his duties in Vienna sometime prior to 1 June. Although Alexander Voronin, Director of the Purchasing Office, had hoped to replace Sidorenko, the latter's position was filled temporarily by one Parushkin who was sent from the USSR.
2. Parushkin was accompanied by another Soviet official, Uspensky, who was appointed Deputy Director General of the SNV. Uspensky is expected to be transferred from this position to that of Chief of the Mechanical Section.
3. K.I. Sipiagin, formerly assistant director of the SNV Purchasing Office, has been reassigned as Director of the Soviet Building Administration, Vienna IV, Favoritenstrasse, replacing a Soviet female official who returned to the USSR. Sipiagin's work in the Purchasing Office has been turned over to Vtarvenko, a Soviet official who replaced Sipiagin temporarily in September 1951, and who returned to Vienna late in March 1952.
4. Engr. Shvetsov, who was assigned to the Exploratory Drilling Section in Aderklaa in January 1952, departed for the USSR on 16 May.

Matzen and Aderklaa

5. SED Matzen has completed drilling on 30 new wells, where cementing and installation of pipe have now begun.
6. A new well has been shot in Aderklaa which delivers nearly pure oil at the

of 250 tons per 24-hour period. The well extends to a depth of 2,700 meters. The chief driller and his assistants received payment for completing this well, which is estimated to have cost a total of 12,000,000 schillings. Drilling proved successful in the vicinity of Pilschaden in the Bohemian field. SEB-Aderklaa has now installed drill rigs in this area.

Explorations

Explorations in Klein-Neusiedl have been severely handicapped by the sandy soil, which requires the use of approximately twice as much cement for this field as for other SMV fields. Nevertheless the new field has proved so successful, both in oil and in natural gas, that SMV officials have reportedly considered moving certain offices from Aderklaa to Klein-Neusiedl. Good results are expected in May and June when 26 wells will be shot in the vicinity of Schwechat. A natural gas pipeline is now under construction, to be laid from Klein-Neusiedl to Aderklaa.

Successful exploratory drillings have been made as far west as Deutsch-Wagram. Tests outside Schwechat along the road to Schwedoff indicate that this area is rich in natural gas.

Engineers are trying to obtain 8" x 11 mm drilling pipe for use at Schwechat, in the southernmost sector of the Klein-Neusiedl field. The 8" pipe now in use has a tendency to break under the strain of high pressure. Further pipe requirements at Schwedoff consist chiefly of 4" pipe and 2 1/2" pipe, both readily obtainable.

Oil Locations

As a result of favorable test drillings in Zwerndorf near the Austro-Hungarian border, the Office for Deep Well Drilling plans to open a new field in this area during April or May.

It is rumored that oil maps dating from the Nazi period were found recently in the offices of Roholc A.G. The maps reportedly indicate oil veins surrounding the city of Vienna, and a particularly good vein running from the vicinity of Werdere Zollamtstrasse in Vienna III to St. Marx.

Warehouses

SEB General Warehouse in Neusiedl has instituted a system of work shifts, and is now operating day and night. The principal work consists of unloading shipments from the USSR.

SEB began construction of a new warehouse in Auerthal about the first of March 1952. Considerable work was completed on this project by the following month, but the work has since ceased, probably until fall, because of the economy measures now in effect. The new installation will be much as large as the Central Warehouse in Neusiedl, and will include two railroad spurs, with loading and unloading ramps, instead of a single spur as in Neusiedl. It is planned to equip the Auerthal warehouse with electric cranes.

Need for additional warehouse facilities is reflected in the present situation at the Matzen, Prottes and Gaasersdorf railroad stations, now filled with Polish coal and other railroad deliveries which have not yet been unloaded. The Austrian Federal Railways have closed these stations to SEB until further notice. It is hoped that unloading can be expedited with the use of three large mobile cranes, now under construction by Wiener Maschinen- und Eisenkonstruktion A.G. for delivery to Wieselend, Prottes and Auerthal.

Other Import Shipments

19. The following miscellaneous import shipments were delivered to the SMV between 20 February and 12 May 1952:

From the USSR

- 6 four-ton trucks, costing 70,000 schillings each, from Techno-Prom Import, Moscow.
- 1 case of armatures, weighing 57 kilograms, from Techno-Prom Import, Gen.
- 230,420 kilograms of rough sheet-iron, 1 meter x 2 meters in area and 30-40 mm thick, from Zaporozhe and Dnepropetrovsk.
- 197,060 kilograms of sheet-iron from Magnitogorsk.
- An unspecified quantity of pendulum roller bearings, which the SMV turned over to Mannesmann-Traulz A.G.

From Western Germany

- 10 tons of fire extinguisher fluid from Dr. Richard Stamer, Hamburg 48, Liebigstr. 5.
- 5 carloads of barite, weighing a total of 75,950 kilograms, from Vertriebsgemeinschaft fuer Harzer Zinkoxyde Werner & Neubach, Osterode im Harz, (3)
- 4,500 sacks of barite, weighing a total of 226,800 kilograms, from Vertriebsgemeinschaft fuer Harzer Zinkoxyde Werner & Neubach, Osterode im Harz, (3)

From East Germany

- 5 crates of machine-driven centrifugal pumps, weighing a total of 1,775 kilograms, from Pumpenfabrik, Aschersleben, (4)

From Switzerland

- 1 package of pump elements, weighing 25 kilograms, from Duap A.G., Herzogenbuchsee, via Spedition Gebrueder Weiss.

From Hungary

- 90,780 kilograms of Fuller's earth from Chemolimpex.
- 1 windlass for well apparatus (Sondenbehandlungswinde) mounted on a large tractor, from Maszalai.

From Czechoslovakia (5)

- 2 cases of automobile parts, weighing a total of 95 kilograms, from Vetrans, Prague.
- 5 cases of automobile parts, weighing a total of 158 kilograms, from the Skoda firm.

The Czechs have cancelled shipment of ten Tatra-Plan and Aero Minor trucks, 50 Tatra-Plan and Aero Minor passenger automobiles, and sizeable quantities of Skoda and Tatra parts, which had been ordered by the SMV.

Refineries

15. Sulfuric acid deliveries from ISL-controlled Donau-Chemie I.G. to the GSV totalled 309,310 kilograms for the months of February, March and April 1952. The following figures show how these amounts were allocated to the refineries.

RefineryNo. of Kilograms of Sulfuric Acid

	<u>February</u>	<u>March</u>	<u>April</u>
Hansa Danow	15,080	45,900	45,620
Hornesburg	11,960	-----	-----
Versandorf	31,000	47,180	15,380
ISL II	17,000	-----	-----
Kirchberg	30,000	16,000	15,310
Hochbierbaum	-----	15,600	-----

Pipe Shipments from the USSR

16. During the period from 20 February to 12 May 1952 the GSV received delivery of the following pipe shipments from the Soviet Union: (1)

<u>Origin</u>	<u>No. of Kilograms of Pipe</u>
Khromsk	586,085
Oralsk	50,463
Taganrog	212,070
Dnyeprovsk	21,375
Unspecified points	2,957,262

Pipe Shipments from Czechoslovakia

17. During the period from 20 February to 12 May 1952 the GSV received delivery of the following pipe shipments from Czechoslovakia:

<u>Origin</u>	<u>No. of Kilograms of Pipe</u>
Prague	15,450
Vitkovice	32,770
Krucice	17,430
Unspecified points	30,456

Pipe Shipments from Hungary

18. During the period from 20 February to 12 May 1952 the GSV received delivery of 233,010 kilograms of pipe from Maseolai, Budapest, and 21,684 kilograms of pipe from unspecified points in Hungary. The shipments from Maseolai included 146,696 kilograms of casing pipe, which was delivered to the Office for Experimental Drilling and Deep Well Drilling in Pecs. (2)

SMV Purchasing Office

20. The monthly turnover at the SMV Purchasing Office amounted to approximately 64,500,000 schillings for January and 39,000,000 schillings for February 1952. (6) No figures are available for the monthly turnover during the period March - May.
21. During March 1952 the debts of the Purchasing Office were officially estimated at 36,000,000 schillings. This estimate was later revised to 50,000,000 schillings, excluding amounts owed for pipe. In April the Soviet Military Bank released a total of 4,000,000 schillings to the SMV.
22. On 5 May 1952 Director Voronin of the Purchasing Office was required to submit lists of all material purchased by the SMV and delivered to the oil fields since 1 January 1952. The lists were flown to Moscow.
23. During the period from 22 January to 12 May 1952 the SMV Purchasing Office paid cash for purchases from the following suppliers. All USIA-controlled firms in this list have been noted with an asterisk. Unless otherwise indicated, all non-USIA enterprises are located in the non-Soviet sectors of Vienna.

SMV Shipments to Hungary

24. During March 1952 the following shipments were made by truck from the SMV to the Austro-Hungarian border at Hegyeshalom for delivery to Maszalai, Budapest:
- 15 roll chisels from the USSR, size 9 3/4 inches.
 - 10 roll chisels, size 7 3/4 inches, from Mannesmann-Traulz A.G.
 - 35 roll chisels, origin and dimension unspecified.
 - 10 2 1/2-inch pumps for deep wells (Tiefpumpen).
 - 10 2-inch pumps for deep wells.
 - 1 truckload of deep well drilling apparatus from Mannesmann-Traulz A.G.
 - 1 truckload of flanges and drilling equipment from "Canada", Tiefbohrgeraete- und Maschinenfabrik G.m.b.H.
 - 4 measuring instruments.
 - Assorted gaskets from Richard Klinger A.G., Gumpoldskirchen.
 - Needle valves from Albrecht (sic).
 - 1 truckload of assorted oil testing equipment and pipe sleeves from the Karandage Section of the SMV.
25. Although further shipments have not yet been confirmed, the SMV will reportedly deliver the following additional equipment in exchange for casing pipe and other material received from Maszalai (see paragraph 28 above):
- 2 carloads of pumps for deep wells.
 - 3 rinsing pumps from Mannesmann-Traulz A.G.
 - 2 Diesel motors from Simmering-Graz-Pauker A.G. fuer Maschinen-, Kessel- und Waggonbau.
 - 1 carload of heavy rods (Schwerstaenge), weighing three tons each.
 - 500 tool chisels from Mannesmann-Traulz A.G.
 - 300 roll chisels from the USSR, sizes 7 3/4 inches and 9 3/4 inches.
 - Measuring equipment valued at 1,000,000 schillings.
 - Miscellaneous small articles from Standard Gesellschaft fuer Technische Artikel and from "Semperit" Gummiwerke A.G.
- 25X1A (1) Comment: Some of the Soviet pipe delivered to the SMV on 14 February was subsequently turned over to the DDSG. This was a small shipment, consisting either of steam pipe or of oil pipe which can be used for filling DDSG fuel tanks.
- 25X1A (2) Comment: Source has not yet confirmed the arrival of the following shipments, reportedly due from Maszalai late in March 1952:
- 1 carload of tool joints
 - 3,000 meters of 3 1/2-inch couplings
 - 4,000 meters of 4 1/2-inch couplings
 - 180 tons of 8-inch casing pipe

25X1A

- 25X1A (3) [] Comment: This barite delivery probably represents a part of the 300 tons shown in the SMV purchasing list. See paragraph 23.
- 25X1A (4) [] Comment: Cannot be identified through available reference material.
- 25X1A (5) [] Comment: All Czech exports to Austria which are handled by Juschmeschtrans must now be accompanied by a certificate from the Czech Commercial Attache in Vienna declaring that the goods have been paid for.
- 25X1A (6) [] Comment: In [] Source reported the monthly turnover for January as 36,589,367.00 schillings.
- 25X1A (7) [] Comment: During March 1952 the SMV received 29,000 schillings worth of cable from the "Ariadne" firm. Payment will probably be made by the Soviet Military Bank instead of through the SMV Purchasing Office.
- 25X1A (8) [] Comment: The SMV is now purchasing 4-inch API chains from Mannesmann-Traulz A.G. to supplement the 3-inch rotary chains obtained from Dr. Josef Kresse.
- 25X1A (9) [] Comment: This firm has ceased deliveries to the SMV because of the Soviets' failure to pay previous debts.
- 25X1A (10) [] Comment: Poelzl recently received a 300,000 schilling check from the Soviet Military Bank in payment for 80 pendulum roller bearings. The check was made out in the name of Reiter. []
- 25X1A (11) [] Comment: During March 1952 this firm delivered electrical units, costing a total of 32,000 schillings, to the SMV. Payment will probably be made by the Soviet Military Bank.
- 25X1A (12) [] Comment: During March 1952 this firm supplied 170,000 schillings worth of cable to the SMV. Payment will probably be made by the Soviet Military Bank.
- 25X1A (13) [] Comment: This may represent payment for the fire extinguishing fluid delivered by Dr. Richard Stamer of the same address as Baruschka. See paragraph 19 above.
